

BUTTERFLY CHECKLIST FOR THE EL CIELO AREA

Roland "Ro" Wauer @ 2007

The following list utilizes the common names from Kim Garwood and Richard Lehman's "Butterflies of Northeastern Mexico" (2nd ed). Other common names from various sources are included in brackets. Scientific names are derived from the "Interactive Listing of Mexican Butterflies 9-1-06," available at www.mariposasmexicanas.com/Bfly_Names.htm. The order generally follows the North American Butterfly Association's "Checklist and English Names of Mexican Butterflies: 1709 species" (20 Sept. 2005), available at: www.naba.org/chapters/nabast/MexEngNames.htm.

The El Cielo Area includes all of Tamaulipas, including the lowlands along the Rio Sabinas, the highlands of Gomez Farias, Alta Cima, and San Jose, and along the Ocampo Highway, as well as the El Naranjo/El Salto area of San Luis Potosi.

Additions and/or corrections to the list are welcome; please send them to Ro Wauer at rwauer@viptx.net.
